

## Latihan 2

Selesaikan soalan di bawah :

$$1 \quad \frac{1}{5} + \frac{4}{6} = \frac{1(x6)}{5(x6)} + \frac{4(5)}{6(5)}$$

$$= \frac{6}{30} + \frac{20}{30}$$

$$= \frac{26}{30} = \frac{13}{15}$$

$$2 \quad \frac{2}{3} + \frac{1}{4} =$$

$$3 \quad \frac{8}{9} + 2\frac{5}{6} =$$

$$4 \quad \frac{4}{5} + 3\frac{1}{3} =$$

$$5 \quad 2\frac{1}{3} + \frac{2}{6} + 7 =$$

$$6 \quad \frac{3}{4} + 5 + 1\frac{1}{2} =$$
